

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

READY RECKONER
FOR THE
CORN TRADE

A
READY RECKONER
FOR THE
CORN TRADE

TO CALCULATE THE VALUE OF ANY WEIGHT OF
WHEAT, BARLEY, OATS, MAIZE, PEASE, BEANS, RYE, FLOUR, &c.
FROM

1 lb. to 1000 tons

AT ANY PRICE PER QUARTER, SACK, OR BARREL, FROM

17s. to 70s.

OR PER CENTAL, FROM

4s. 6d. to 10s. Od.

FOR THE COUNTING-HOUSE USE OF
MERCHANTS, BROKERS, FACTORS, MILLERS, &c.

BY
FRANK F. SHERRIFF.

Time is Money.

AND PARLIAMENT STREET

PREFACE.

No branch of commerce in this country possesses a more complicated system of weights and measures than the corn trade. Quarters, bushels, bolls, barrels, bags, sacks, centals, loads, coombs, hobbetts, windles, and a host of other local customary terms of sale of various weights and capacities exist in different parts of the country, rendering the comparison of quotations and the re-invoicing of corn that has been bought in one market and resold in another problems in arithmetic often requiring long and intricate calculations to solve. Electricity and steam on the other hand have effected a revolution in commerce that has made despatch in business one of its most essential elements, and has rendered every invention to facilitate and expedite commercial transactions important to all who would keep pace with the times. A Ready Reckoner to economise time and minimise mental exertion is virtually an invention of this nature; for, as time to a business man is money and brain is his stock-in-trade, the value of a Ready Reckoner which economises both is manifest. Economy of time may appear to many more important than economy of brain power, but the latter, although apparently a matter of small moment, is really one of more vital importance. The brain continually on the strain, like a bow tightly strung, gradually loses its power and vigour unless occasionally relaxed. Rest to the brain is as necessary as to the body. Intervals of business employed by business men in racking their brains with tortuous calculations might, with the assistance of a Ready Reckoner, afford that rest and relaxation to the mind so necessary to its welfare, permitting it to husband its strength for the other more important branches of business. How often do we find that a clerk continually employed at accounts becomes in course of time a mere calculating machine, unfit for aught else but a piece of counting-house furniture; the unintermittent strain on his mind so impairing and cramping his powers as to entirely incapacitate him for other pursuits.

The simplicity with which accounts can be calculated with the assistance of this work, as compared with the tortuous calculations that would otherwise be necessary, is manifested in the following examples:—

EXAMPLE I. What is the value of 50 qrs. of oats at 27s. 9d. per qr.? Turn to page 27 in the Cash Tables, and opposite 50 qrs. is the answer—£69. 7s. 6d.

EXAMPLE II. What is the value of $119\frac{47}{100}$ centals, at 7s. 10d. per cental? Turn to the Cental Tables, and it will be found that

100 centals	=	£39	3	4
19 "	=	7	8	10
67 lbs.	=	0	5	3
Answer		£46	17	5

EXAMPLE III. What is the value of $430\frac{311}{1000}$ qrs. of wheat at 47s. 9d. per qr.? By reference to the Weight Table the decimal equivalent of $\frac{311}{1000}$ will be found to be .760. Turn to page 47, and in column headed 47s. 9d. it will be found that

400	qrs.	=	£955	0	0
30	"	=	71	12	6
.700	"	=	1	13	5
.060	"	=	0	2	10½
Answer			£1028	8	9½

Compare these figures with the following calculation that would otherwise be necessary :—

The value is required of 430 $\frac{377}{496}$ qrs. at 47s. 9d. per qr. ?

6d. = $\frac{1}{2}$)	qrs. 430 47	6d. = $\frac{1}{2}$)	lbs. 377 47
	3010		2639
	1720		1508
	20210s.		17719s.
	215		188 6d.
3d. = $\frac{1}{4}$	107 6	3d. = $\frac{1}{4}$	94 3d.
	20) 20532 6	496) 18001	9d. (36s. 3 $\frac{1}{2}$ d. or £1 16 3 $\frac{1}{2}$
430 qrs. =	<u>£1026 12 6</u>		1488
			3121
			2976
			145s.
			12
			1749d.
			1488
			261
			4
			1044f.
			992
			<u>52</u>
			430 qrs. = £1026 12 6
			$\frac{377}{496}$ qrs. = 1 16 3 $\frac{1}{2}$
			Answer <u>£1028 8 9$\frac{1}{2}$</u>

The amount of time and labour here expended is virtually doubled when the fact is taken into account that before transferring the result of this sum to the body of the invoice a repetition of the calculations is necessary to avoid error; while a small mistake often necessitates the recalculation of the whole sum, entailing a third and fourth repetition of the calculations, when with the assistance of these Tables no calculation whatever would have been necessary.

Although the anomalous system of weights and measures existing in the Corn Trade renders a Ready Reckoner for the Trade so desirable, the number and variety of weights and measures prevailing present obstacles that render the construction of a really useful Work for the Trade at large extremely difficult. Indeed such a Work to be really useful to all sections of the community would have to contain such a mass of tables that the most enterprising of publishers would hesitate to undertake the publication of so bulky and costly a volume. The Work will therefore be issued in parts suited to the requirements of the different sections of the Trade; of which parts the first three are now ready, viz. :

Part I. Cash Tables, rising 3d. per qr. from 17s. to 70s., with decimals to ascertain the value of fractional parts of quarters.

Part II. Cental Tables, giving at a glance the value of any quantity of corn or grain sold by the cental of 100 lbs.

Part. III. Weight Tables to find the number of quarters in any given weight, or the weight of any given number of quarters, with the decimal equivalents of fractional parts.

It may be as well to add that, although the greater portion of the Work is based upon the decimal system, no knowledge whatever of decimals is necessary in its application.

F. F. S.

PART I.

CASH TABLES.

AND PARLIAMENT STREET

PART II.
CENTAL TABLES.

EXPLANATION.

The following tables give at a glance the value of any quantity of corn or grain sold by the cental of 100 lbs., and not only save much time in checking and calculating accounts, but also ensure accuracy, a most essential element in business.

EXAMPLE I.—What is the value of 200 centals of maize at 4s. 11d. per cental? Turn to page numbered 4s. 11d., and opposite to 200 centals is the answer, viz. £49. 3s. 4d.

EXAMPLE II.—What is the value of $119\frac{67}{100}$ centals of oats at 7s. 10d. per cental? Turn to page numbered 7s. 10d. and it will be found that

$$\begin{array}{rcl} 100 \text{ centals} & = & £39 \quad 3 \quad 4 \\ 19 \text{ „} & = & 7 \quad 8 \quad 10 \\ 67 \text{ lbs.} & = & 0 \quad 5 \quad 3 \end{array}$$

$$\text{Answer } \underline{\underline{£46 \quad 17 \quad 5}}$$

EXAMPLE III.—What is the value of 207 cwt. 0 qrs. 23 lbs. of wheat at 8s. 11d. per cental? Turn to page-numbered 8s. 11d. and it will be found that

$$\begin{array}{rcl} 200 \text{ cwt.} & = & £99 \quad 17 \quad 4 \\ 7 \text{ „} & = & 3 \quad 9 \quad 11 \\ 23 \text{ lbs.} & = & 0 \quad 2 \quad 0\frac{1}{2} \end{array}$$

$$\text{Answer } \underline{\underline{£103 \quad 9 \quad 3\frac{1}{2}}}$$

Sales are frequently effected in which the halfpenny forms a part of the price. A table has therefore been added showing the value of the additional halfpenny.

EXAMPLE IV.—What is the value of 500 centals of barley at 7s. 11½d. per cental? Turn to page numbered 7s. 11d. and 500 centals will be found to equal £197. 18s. 4d.; now turn to the halfpenny table and 500 centals at ½d. = £1. 0s. 10d., which added to £197. 18s. 4d. is the answer, £198. 19s. 2d.

The Hundredweight Table at the end of the Cash Tables will be found useful to reduce hundredweights to centals or centals to hundredweights.

EXAMPLE V.—How many centals are there in 209 cwt. 0 qrs. 17 lbs.? Turn to the table and it will be found that

$$209 \text{ cwt.} = 23,408 \text{ lbs.} + 17 \text{ lbs.} = 23,425 \text{ lbs. or } 234\frac{25}{100} \text{ centals.}$$

EXAMPLE VI.—How many hundredweights are there in 120 centals? 120 centals are 12,000 lbs. Take the nearest lesser number of lbs. in the table, viz.:

$$\underline{\underline{11,984 = 107 \text{ cwt. } 0 \text{ qrs. } 16 \text{ lbs.}}}$$

Quotations per cental are also easily compared with prices ruling in other markets; thus wheat at 8s. 3d. per cental will be

$$\begin{array}{lcl} \text{per } 504 \text{ lbs.} & \left\{ \begin{array}{l} 5 \text{ centals} = 2 \quad 1 \quad 3 \\ 4 \text{ lbs.} = 0 \quad 0 \quad 4 \end{array} \right\} & = 41s. 7d. \\ \text{„ } 496 \text{ lbs.} & \left\{ \begin{array}{l} 4 \text{ centals} = 1 \quad 13 \quad 0 \\ 96 \text{ lbs.} = 0 \quad 7 \quad 11 \end{array} \right\} & = 40s. 11d. \\ \text{„ } 280 \text{ lbs.} & \left\{ \begin{array}{l} 2 \text{ centals} = 0 \quad 16 \quad 6 \\ 80 \text{ lbs.} = 0 \quad 6 \quad 7\frac{1}{2} \end{array} \right\} & = 23s. 1\frac{1}{4}d. \end{array}$$

$\frac{1}{2}$ d. PER CENTAL.

EXPLANATION.

EXAMPLE I. What is the value, at 47s. 6d. per qr. of 496 lbs. of a parcel of wheat weighing 214 cwt. 3 qrs. 19 lbs.? On page 15, in column 496, it will be found that $212 \text{ ,, } 2 \text{ ,, } 8 \text{ ,,} = 48 \text{ qrs.}$
 Turn to page 9 $\frac{2}{2} \text{ ,, } 1 \text{ ,, } 11 \text{ ,,} = \frac{263}{2} \text{ or } (131\frac{1}{2})$
 Turn to the Cash Tables, and at 47s. 6d. 48·530 qrs. = £115. 5s. 2d.

Turn to the Cash Tables, and 4870·760, at 48s. 6d., is £11,811. 11s. 10½d.

The Tables also give the exact weight of any given number of quarters.

East Indian Wheat Invoices are frequently rendered in lbs.; a special table per 492 lbs. has therefore been added.

EXAMPLE V. What is the value of 221,538 lbs. at 4*s.* 9*d.* per 492 lbs. ? Turn to the Table and take the nearest lesser number to the question, viz., 221,400 lbs. = 450 qrs., with 138 lbs. over; the decimal equivalent of which is given on the page opposite, viz. .280. Turn to the Cash Tables, and the answer to 450.280 qrs. at 4*s.* 9*d.* is £1,052. 10*s.* 7½*d.*

Only the decimal equivalents of fractional parts of qrs. of 336 lbs. and 448 lbs. are given, because the number of quarters in any weighed quantity is easily ascertained by dividing the cwts. by 3 for 336 lbs. and 4 for 448 lbs.

EXAMPLE VI. 4) $\begin{array}{r} \text{cwt.} \quad \text{qrs.} \quad \text{lbs.} \\ 433 \quad 2 \quad 13 \end{array}$ per qr. of 448 lbs. Divide the cwt. by 4, and the result is 108 qrs. and 1 cwt. 2 qrs. 13 lbs. over, = $\frac{1}{4} \frac{1}{8}$, or '404.

1 bushel = '125 qrs. | 3 bushels = '375 | 5 bushels = '625 | 7 bushels = '875

2 " = '250 " | 4 " = '500 | 6 bushels = '750 | 8 bushels = '1000

EXAMPLE VII. 6 bushels at 54s. 9d. per qr. $\left. \begin{array}{r} .700 \\ .050 \end{array} \right\} \text{£}2. 1s. 0\frac{1}{2}d.$

Condensed Table to reduce cwt.s. or qrs. of specified capacities to lbs. or centals;
